

Population Health Management and Coordination

Community Engagement

- Create community-based health leadership and shared responsibility to improve health.
- Identify community health needs, obstacles, and effective solutions
- Provide health information and support where, when and how it is needed for different populations

PC/Community-Based Workforce Development

- Expand PC capacity, address PC shortage
- Improve PC providers' professional satisfaction and encourage multidisciplinary practice
- Practice to the extent of license
- Enhance population health management and evolving care systems

Care System Redesign

- Develop continuum of care across levels/types of health care services with coordinating informational and operational systems
- Optimize the delivery of integrated, coordinated, patient-centered care regardless of setting or clinical provider
- Identify services that LVHN will provide within continuum of care
- Improve population and individual health outcomes, lower costs
- Serve community health needs by promoting delivery system reform and efficiencies

2013- 2016 Strategic Initiatives

Strategic Initiatives

- Leadership development
 - Train the trainer/Spanish language health outreach
 - Neighborhood initiatives
- Stakeholder partnerships to identify needs, services, support e.g.(employers, schools, agencies)
- Initiatives targeting chronic illness e.g. (asthma), elderly (transitional care, fall prevention), children
- Information (Social Reconnaissance to targeted audience, other resources)

Strategic Initiatives

- Pilot program for PC care delivery (Realign financial incentives)
- Development of continuum of care through physicians, advance practice nurses, other providers; practice to limits of license
- Expansion of work under LVHN HRSA grant for nurse providers/multi-disciplinary training

Strategic Initiatives

- Assessment of LVHN role in continuum of care, affiliations
- LVHN engagement in pilot programs to promote health and well-being of targeted vulnerable populations in a non-fee-for-service environment, supporting best practices research
- Integration of behavioral health through continuum of care
- Develop oral health initiatives within continuum of care

Development of information infrastructure/analytical capabilities to support Strategic Focus Areas
